

RESEARCH INVITATION - HELP FURTHER THE KNOWLEDGE IN OSTEOPOROSIS MANAGEMENT IN PREMATURE MENOPAUSE

Are you a **Health Professional**?

Do you manage the care of women who have **early or premature menopause** (menopause before age 40 years), or **POI** (premature / primary ovarian insufficiency), **whether spontaneous or following medical treatment** (e.g. chemotherapy, radiotherapy or surgical removal of the ovaries)?

THEN WE WOULD LOVE TO HEAR FROM YOU!

Your participation will help increase the understanding, awareness and improve management of premature menopause associated low bone density/ osteoporosis in both consumers and health professionals. Based on the information we gather, we will develop online resources/tools for women and health professionals regarding PM and bone health.

Participation involves completing a brief **online anonymous survey** that takes approximately 15 minutes.
